

<b>Method of Calculating Valuation-Based Construction Fees</b>		
<i>At Submittal</i>	<i>At Issuance</i>	
<b>Plan Review Fee Estimate</b>	<b>Inspection Fee</b>	<b>Plan Review</b>
The estimate is based on your statement of the fair market value of the construction including all labor and materials. Your value may not be the same valuation determined by the plans examiner during review.	The plans examiner determines the department valuation of the construction using valuation data tables from nationally recognized code organizations. This table is based on the square footage, type of construction, and type of occupancy. We may use other approved sources to determine valuation.	The plan review fee is 65% of the inspection fee.
The fee estimate is used as a credit against the plan review fee.	Use the following table and the department valuation to determine the inspection fee.	We credit the estimate against this fee. We apply any excess to the inspection fees.
(ROUND final fee calculation to the nearest total dollar)		
<b>Department Valuation</b>	<b>Inspection Fee [Review fee is an additional 65% of the inspection fee]</b>
